Have your antiperspirants failed you?

Try Botox for Underarms Sweating – RMB 1000 off

Sweating (perspiring) is a common body process that occurs in various areas of the body, and is experienced by everyone. However, some people have excessive sweating that may interfere with their daily activities and even be embarrassing at times. If that has been the case for you, try Botox for Underarms Sweating, which works by temporarily blocking the chemical signals from the nerves that stimulate the sweat glands. When the sweat glands don't receive chemical signals, the excessive sweating stops (Source: botoxseveresweating.com). Consult our doctors to find out more while the offer lasts, and SAVE RMB 1000 for your treatment (valid for both US and China Botox).

Nose Augmentation: Enjoy 50% OFF

Bioscor offers nose reshaping surgeries for both aesthetic and medical purposes. It can be done to reduce or increase the size of your nose, change the shape of the tip or the bridge, narrow the span of the nostrils, or change the angle between your nose and your upper lip. It may also correct a birth defect or injury, or help relieve some breathing problems. Different methods are applied to each patient depending on what the problem is. Consult with our doctors for more details, and if you do go ahead with the procedure this month, you will save yourself 50%. It can't get any better than this.

Would you like to have your Eyebags Removed or Droopy Eyelids corrected?

Imagine having the procedure absolutely FREE OF CHARGE. Yes, it is possible at Bioscor this month. We will select and offer a client from among those who are interested in any one type of eyelid surgery (eye bag removal, correction of droopy eyelids, or double eyelid procedure) to have it done by our Cosmetic Surgeon at no cost at all (Notes: Bioscor holds the rights for selection & final approval; Client must agree to his/her medical photography being used for publicity, promotion, or other advertising purposes; Strictly for eyelid surgery ONLY, not any other surgery).
